### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 12-16, 23-27, 34-38, and 45-49, drawn to a system/server/method with charge processing and kickback processing, classified in class 705, subclass 400.
  - II. Claims 6-11, 17-22, 28-33, 39-44, and 50-55, drawn to a system/server/method with tool processing, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a system which determines fees for an item, where as Invention II as a separate utility of modifying the saved content. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
